

## A Level Design and Technology - task

Task: it is interesting to look ahead at where an A Level in D&T can take you at degree level. For your A Level D&T coursework you choose what you design and make so if you're considering taking A Level D&T then I'd like you to start thinking about this by looking at the following links. Due to COVID19 in 2020 all degree shows were cancelled – so students work was exhibited online. These exhibitions are still online so please click on each link and look through the work. I'd like you to pick out two products that you like and write why you have chosen these. We'll be discussing these once you're back in September. There are some really interesting and innovative ideas produced by university students.
